EXPERIENCE

MERN STACK DEVELOPMENT INTERN

Aptitude Guru Hemchandar

01 Dec 2025 – 19 Dec 2025

- Completed hands-on MERN stack training covering MongoDB, Express.js, React.js and Node.js through daily practical sessions.
- Applied the training to develop HOMEFIX, a smart home-service management platform with customer service requests and technician job handling.

SELECTED PROJECTS

01

SETU

Smart Donation & Community Assistance Platform

React.js • Vite • Spring Boot • Spring Security • JWT • MySQL

Role-based donation platform connecting donors, volunteers, organizations and beneficiaries. Supports secure authentication, donation lifecycle tracking, delivery monitoring, notifications and feedback verification.

02

HOMEFIX

Smart Home Service Management Platform

React.js • Vite • JavaScript • Node.js • Express.js • MongoDB

Home-service platform for reporting maintenance issues and connecting customers with service providers. Supports service requests, job acceptance, status updates and customer-technician communication.

03

FREELANCEAI

AI-Powered Freelancing Platform

React • Vite • FastAPI • PostgreSQL • SQLAlchemy • OpenRouter

Multi-agent AI platform automating requirement analysis, freelancer discovery, proposal intelligence, budget estimation, project planning and progress recovery.

- Uses multi-factor talent ranking, structured JSON validation, retry mechanisms and rule-based fallbacks for resilient AI workflows.

ACHIEVEMENTS

LANGUAGES

C • C++ • Python • Java • JavaScript • HTML5 • CSS3

FRAMEWORKS & TECHNOLOGIES

React.js • Vite • Node.js • Express.js • Spring Boot • Spring Security • JWT • REST APIs • FastAPI

DATABASES & TOOLS

MongoDB • MySQL • PostgreSQL • Postman • AWS • Vercel • Git/GitHub
